***Allowable Subject Matter***

For claim 1 “wherein a region of influence associated with the first sub-frame pixel value comprises a number of pixel values that corresponds to a number of iterations used to generate the first and the second sub-frames” is not found in the prior art. In claims 12 and 20 the number of iterations is not controlled in this manner. In claim 25 “generating a second error value using the image data and the third plurality of initial values; and generating the second sub-frame pixel value using the image data, the second plurality of initial values, the first history value, the second history value, the first error value, and the second error value” is not found in the prior art of record. The remaining claims depend from these claims and therefore contain allowable subject matter
